

How to use Voice Guide System

1 Place the earphones above your ears as shown. Place the buds upon your temples. These are bone conduction earphones and cannot be inserted into ears.

2 Please hang the tablet device around your neck. Please take care not to drop the tablet device or collide with the display cases. There is a transmitter attached to the tablet. Please take care not to remove the wire. If the wire is removed, the audio explanation will not open.

3 First, please select the desired audio language.

4

Please proceed to the explanation points designated by the signs. The detected explanation points are displayed in orange around the numbers on the map. The screen display will change and the audio explanation will begin automatically. Explanations may not start immediately when reaching an explanation point. Please try raising/lowering the device or changing its position in this case.

5

After you have listened to the explanation, please tap the X button to close the screen. If another explanation point is detected in the middle of an explanation, the corresponding explanation point will be displayed on the bottom right. To open the next explanation, please tap the "Open" button.

6

To listen to a previous explanation again, tap the corresponding number on the floor map screen anytime. The numbers displayed on the floor map are in intended viewing order. Please try to stay in this order as much as possible. Please enjoy the exhibitions.

ex

If you are experiencing problems with your device, please bring it back to the reception desk.

You can adjust the audio volume through the tablet.
